

Supplemental Index for
Juliana Jewelry Reference DeLizza & Elster Identification & Value Guide
 by Ann Pitman (Collector Books)

This index is organized with the most common attributes that come to mind when viewing each style of jewelry coupled with the descriptions in the book. Some types may be listed in more than one category.

CATEGORIES:

Colors – Jewelry where color is one of the predominant identifiers.

Dangling Beads – Styles featuring various types of dangling elements.

Jewelry Types – Christmas jewelry, figural pins, flowers and unusual styles for D&E.

Jewelry Styles – Belts, bracelets (other than link & band construction), link & band necklace example, jewelry made for other companies.

Mainly Rhinestones – Styles comprised of rhinestones without specialty stones or dangling elements.

Metal Accents & Metallic Finishes – Jewelry containing distinctive metal work or finishes on beads that look like metal.

Specialty Stones – Examples containing specialty stones D&E jewelry is known for incorporating.

Stone Shapes – Styles distinguished primarily by the shape of the stones used.

Unusual Necklaces – Examples of necklaces not typically associated with Juliana jewelry.

***Note:** In many instances in this book, marquis shaped stones are referenced as **navettes** and round shaped stones are referred to as **chatons**.*
